Introduction, Summary and Method

INTRODUCTION

The "Calgary Industrial Land Survey" for the City of Calgary has been issued since 1971. Starting in 1980, the semi-annual publication was discontinued and one mid-year report is prepared covering a twelve month period.

Similar to the preceding reports, this present issue records historical data relating to industrial land absorption, subdivision activity and provides an inventory of vacant industrial land. Detailed information is given particularly for sites which are currently vacant and developable.

The present report of 1982, June 30 compiles data pertaining to:

a. Industrial land absorption from 1973 to 1982, June 30 inclusive. Table 1 shows the absorbed number of sites and their net acres by the type of use, land use designation, size and services provided.

b. Industrial subdivision plans registered between 1973 and 1982, June 30. Table 2 shows the number of sites, the total gross and net area created by these plans by land use designations.

c. The inventory of vacant developable industrial land. The data are presented in four components:

   i) A summary of vacant acreage by industrial districts and land use designations. The distribution by City and private ownership is also noted (Table 3).

   ii) A list of vacant sites by sections of the city describing the location of these properties. The land use designation and ownership of each item is also shown.

   iii) The annual vacant industrial land inventory from 1973, June 30 to 1982, June 30 (Table 4).

   iv) Vacant, developable parcels are shown on section maps, which also indicate the land use designations.

d. Future industrial subdivisions in the planning process. These are presented on Table 5. The location, acreage and date of expected opening of the district are indicated by each item. This table is followed by maps outlining these future industrial subdivisions.

SUMMARY

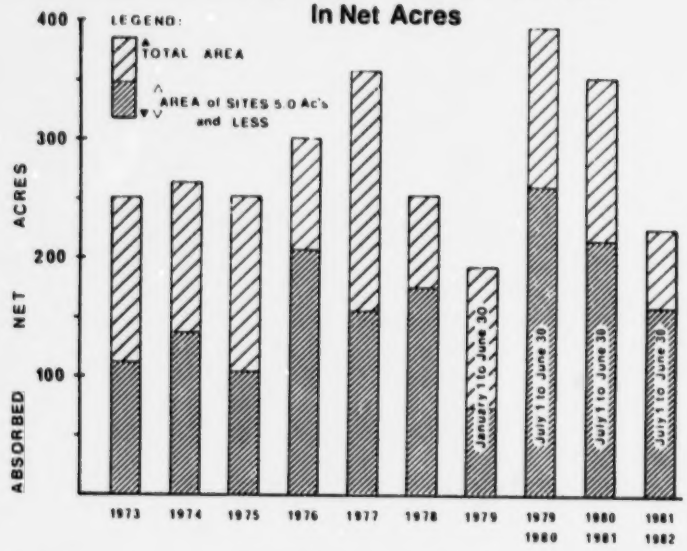
Land Absorption

Statistics presented in Table 1 show that, from 1981, July 1 to 1982, June 30, 223.6 net acres of industrial land have been absorbed in Calgary, which is the smallest annual figure in the past decade. Compared to the preceding one year period, it represents a decrease of 127.9 acres, or 36.4 per cent. The total industrial land absorption in Calgary over the past five years was as follows:

1977	360.0 net acres on 100 sites
1978, July 1 - 1979, June 30	323.2 net acres on 114 sites
1979, July 1 - 1980, June 30	397.6 net acres on 132 sites
1980, July 1 - 1981, June 30	351.5 net acres on 130 sites
1981, July 1 - 1982, June 30	223.6 net acres on 98 sites

The area used up in the "0.1-5.0 acres" site category decreased from the previous year's 216.3 acres to 160.6 acres. The number of sites absorbed in this category has been reduced by 27 to 91, a loss of 22.9 per cent.

Industrial Land Absorption In Calgary, 1973-1982, In Net Acres



As in every year since 1974, most of the land developed was again used for warehousing and commercial structures, regardless of the land use designations of the sites. The division of the total absorbed industrial land during the last five years between the major type of developments has been the following:

Industrial Acres Absorbed by Type of Use

	Warehousing & Commercial		Other Industrial	
1978	228.2	89.2%	27.5	10.8%
1979, June 30	120.1	62.3%	72.7	37.7%
1979, July 1 - 1980, June 30	267.3	67.2%	130.3	32.8%
1980, July 1 - 1981, June 30	269.5	76.7%	82.0	23.3%
1981, July 1 - 1982, June 30	149.3	66.8%	74.3	33.2%
Summary	1,034.4	72.8%	386.8	27.2%

As the above figures indicate, during the past five years an average of seventy-three per cent of the total industrial land consumption occurred for warehousing and commercial purposes.

Subdivision Activity and Vacant Land

During 1981, July 1 to 1982, June 30, 541 gross acres of industrial land were subdivided into 213 sites covering 431 net acres. The entire industrial area which was created by these subdivisions are in the I-2 General Light Industrial District.

About 40 percent of this subdivided land is located in the northeast and 60 percent in the southeast portion of the city.

Calgary's 1982, June 30 vacant industrial land inventory is summarized on Tables 3 and 4. The total vacant industrial land stock at that date was 1,611 net acres, of which the City of Calgary owned 354 acres or 22 per cent. It must be noted that the total inventory figure includes 339 acres located in Sections 22-23 SE which is not serviced by the City water and sewer system. Developments in this area have been approved for companies not requiring these municipal services. However, companies developing in this area are required to sign a deferred servicing agreement with the City which requires them to tie into City services as and when they become available. Similarly, 88 acres of non-serviced sites in the SW ¼ of Section 25 N are also part of the total vacant land figure. This subdivision was approved to accommodate agricultural related uses.

The vacant industrial land inventory has increased by 163 acres since 1981. The present level appears to be sufficient to meet anticipated demand for about five years. In addition to this inventory, as the data contained in Table 5 indicates, about 695 gross acres of land are coming on-stream to meet the future demand.

However, it should be kept in mind that just because a site is vacant and developable, it does not necessarily mean that it is readily available for marketing. The land may be held as

reserve for future expansion of existing companies presently operating elsewhere or the owner simply may not wish to sell it or develop it at the present time. Thus, within the context of this report, "vacant developable" land is defined as land having the necessary physical qualities to permit building and presently has no structure, permanent storage or industrial activity on it. On the other hand, there are several sites listed in this inventory which may already be scheduled for some future industrial development, but if building permits have not been issued yet, these properties are registered in this report as vacant ones.

METHOD

1. INDUSTRIAL LAND ABSORPTION (Table 1). For the purpose of this report "land absorbed" means land which was previously designated as vacant and for which a building permit (in certain cases only a development permit) was issued during the year under study. The sources of information for the statistics contained in Table 1 are: the building permits list, development files, section sheets showing land use designation, utility maps, aerial photos and the industrial land use map. In some cases field survey was also necessary. The Table contains statistics for ten years, from 1973 to 1982, June 30; however, similar information is available from the City of Calgary Planning Department starting from 1959.

2. VACANT DEVELOPABLE INDUSTRIAL SITES (Tables 3 and 4). The primary data concerning vacant, developable industrial sites were obtained from the City of Calgary Property File[1]. A program was written to retrieve all the parcels, from designated sections of the city, having no building assessment and either designated for industrial use or having an assessment classification[2] of "industrial vacant".

1. The "Property File" is a computer record composed of data relating to properties generated from the operation of Civic Departments.

2. The assessment classification is a coding system indicating the type and tax status of all lands or buildings located in Calgary.

The print out provides each parcel with the:

a. Roll Number
b. Location Address
c. Legal Description
d. Land-Building Classification
e. Land Use Designation
f. Owner's Name[3]

Parcels in the following broad categories were excluded from the initial inventory:

a. Parcels without municipal services, where it was determined that, at the present time, the land could not be serviced economically.

   Notable exceptions are sites in Sections 22 & 23 Southeast and those in the SW ¼ of Section 25N. In the southeast area developments are permitted to provide less expensive "incubator" space for industries not requiring immediate full services. Accordingly, the Land Use Designation of these sites is I-4, "Limited-Serviced Industrial District". However, when City services are extended into these sections, owners will have to tie their properties to the utility network. The industrial subdivision in Section 25N is under a Direct Control Land Use Designation, allowing agricultural implement dealerships and associated uses only.

b. Parcels without buildings, but on which regular outside storage or other activity is carried on (e.g. lumber yards).

c. Parcels obviously part of an active neighbouring industrial establishment, owned by the same owner and usually surrounded by a common fence.

d. Isolated small parcels with limited or no access.

3. Sites which are still legally owned by the City, but where a private company holds an option to purchase on the property, are recorded in this inventory as "Private".

e. Parcels lying in areas planned to be re-subdivided.

f. Parcels in the alignment of future freeways.

g. Parcels still vacant but where permits had been issued for building before 1982, June 30.

h. Parcels owned or leased by Calgary Power Ltd. having high voltage power lines over them.

i. Community reserves within an industrial area.

Some parcels not contained in the printout were added to the list. These parcels comprised portions of a site under one ownership that were definitely unused; they were separated from the developed portion and sometimes even posted as "for sale".

The inventory of vacant parcels is presented in the "List of Vacant, Developable Industrial Sites in Calgary, 1982, June 30", showing each item individually and grouped by sections. The same vacant sites are also illustrated on section maps.

The summary of the vacant, developable industrial land is listed in Table 3. Table 4 presents historical data concerning vacant, developable industrial land stock. In Table 3 the data are distributed by industrial districts, land use designations and the totals by "City" and "Other" (private and senior governments) ownership. The corresponding industrial districts are shown on Map 1. The boundaries of these districts are based on generally accepted definitions of industrial areas but are not intended for use in a policy context (i.e. they do not portray official industrial areas as legally defined in the Calgary General Municipal Plan or the Land Use By-law).

3. INDUSTRIAL SUBDIVISION PLANS REGISTERED BETWEEN 1973 AND 1982, JUNE 30 IN CALGARY (Table 2). Information tabulated on Table 2 is based on a list of registered subdivision plans recorded in the Land Titles Office. From that list, those in industrial areas were selected and the number of lots and the gross and net acreages were recorded. The land use designation of the recorded lots was taken from the Land Use Designation Guide Maps of the City of Calgary Planning Department.

4. FUTURE INDUSTRIAL SUBDIVISIONS (Table 5). The sources of tabulated information on Table 5 are the City Planning Department's files of tentative and outline plans. In addition, the City Land Department's Development Officer was consulted about the planned or proposed City-owned areas and their expected year of opening. Approximate boundaries of future industrial subdivisions are drawn on section maps for convenient reference.

5. Land Use Classification and Land Use Designation categories have been shown in this report by abbreviations as they are used in the Development Control By-law (By-law 8600) and in the Calgary Land Use By-law (By-law 2P80).

Land Use Classifications according to By-law 8600 are:

M-1	Restricted Light Industrial District
M-2	General Light Industrial District
M-3	Heavy Industrial District
AM	Agricultural (Future Industrial) District
AP	Airport District
DC	Direct Control District
SDA	Special Development Area. The SDA is not a separate category but is combined with other classifications. Developments in Special Development Areas are subject to regulations described in the Development Control By-law.

Classification designations in brackets indicate a guideline attached to AP or DC categories, e.g. DC (M-2) = Direct Control with M-2 guidelines.

Land Use Designations according to By-law 2P80 are:

I-1	Industrial-Business Park District
I-2	General Light Industrial District
I-3	Heavy Industrial District
I-4	Limited-Serviced Industrial District
UR	Urban Reserve District

Historical statistics in Tables 1, 2 and 4 show land use classification information up to 1979 in terms of By-law 8600, while the 1981-1982 data are sorted into Land Use Designation categories as in By-law 2P80.
